We are looking for GP's to join our welcoming, hardworking and forward thinking team.

**Pembroke
Medical Group**

IT

We use Emis Web in conjunction with all practices in Torbay.

Indemnity

The extra cost on top of crown is fully paid by the practice.

System

We run a hybrid system involving an acute, "on the day" triage team and a "planned" pre-booked team every day.

A typical planned day includes a mixture of calls and f2f appointments (with importantly NO squeezed in extras). Our acute team is made up of GP's, experienced nurse practitioners, pharmacists and a paramedic.

Flexibility

We have flexible contracts to fit around childcare and can be flexible with the number of sessions worked.

Services

For those worried about moving from a different area we have a pack for new GPs which includes the basics of how to refer to the medics / physio etc.

We work hard to have a good team working environment. This means we meet for coffee every day, and are very supportive to new members of our team and enjoy our practice funded socials!!

We work well within the local community giving lots of opportunities for portfolio working including taking part within the Integrated care team, care home visiting team and possibly newer roles on the horizon!

We have a good track record of welcoming trainees and newly qualified GP'S into the practice. We like to think we are friendly and offer support especially in those first few months of transition. We have a duty doctor who has no booked patients so is available for those tricky questions.

If you would like an informal chat about how we work or to come and have a look around at our purpose built practice, please do contact us.

**We look forward to
hearing from you!**
